I ne MAILIN Period for Reply	IG DATE of this communication appe	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive	to communication(s) filed on 15 Fe	ebruary 2005.				
2a) This action i	This action is FINAL. 2b) This action is non-final.					
•	Since this application is in condition for allowance except for formal matters, prosecution as to the ments is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claim	5

Claim Objections

1. Claims 1-2 are objected to because of the following informalities: The term "transversal" should be removed prior to the term "profile" in lines 4-5 and 10 of claim 1, and line 1 of claim 2. The aforementioned term is redundant due to the fact that lines 4-5 of claim 1 state that the profiles extend "transversely from one outer edge of the body to an opposite outer edge". Therefore the term "transversal" is redundant and should be removed from the claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- **2.** The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support for the limitation setting forth that the profile is "formed of a continuous *co-planar* mass of flexible rubber material".

As shown in the drawings, the profiles appear to be a continuous mass of transversely extending rubber material. However, the term "co-planar" infers that a plurality of continuous masses are arranged in a transverse manner across the track

Art Unit: 3617

body, and are located in the same area as defined by a plane. This limitation is not shown in the drawings, nor described in the specification.

It is suggested that the term "co-planar" be removed from claim 1 to clearly describe the invention as supported by the specification.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Moss. In Figure 1, Moss shows a track having an endless longitudinal body with an inner surface 2 with a series of longitudinally spaced drive lugs (see column 3, lines 38-39). An outer surface includes a series of longitudinally spaced profiles 4 that extends transversely from one outer edge of the body to the opposite outer edge of the body.

As best understood, each profile 4 is formed as a continuous co-planar mass of flexible rubber material, due to the fact that the continuous mass of the profile 4 lies within a common plane extending in the transverse direction of the track. The height of the profiles 4 decreases in value from the center of the mass forming the profiles 4 to the outer edges thereof (see column 3, lines 50-54).

Art Unit: 3617

The body is formed of a flexible rubber material free of conventional transversely extending reinforcing embedded rods, thereby providing reduced transverse rigidity to the body. This allows the body and profiles 4 to curvingly flex when engaged in ruts (see Figure 4).

Each profile 4 is formed of three levels of profile sections 8, which include a central section, a pair of opposite intermediate sections, and a pair of opposite edge sections.

Allowable Subject Matter

6. Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-3 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference is a printed publication of a co-pending application by the applicant.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Page 5

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason R Bellinger whose telephone number is 703-308-6298. The examiner can normally be reached on Mon - Thurs (9:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
